Abstract

The \$VGF Token is the digital currency of the VGF Foundation — a blockchain-powered ecosystem where digital assets directly enable real-world services. Built on Binance Smart Chain, \$VGF enables payments for rent, groceries, education, transportation, and rewards within foundation-owned properties. This document outlines token utility, distribution, presale, and circulation — ensuring transparency and sustainability.

1. Introduction

While most tokens remain speculative, \$VGF bridges digital value to physical assets. The VGF Foundation owns and operates apartments, stores, hotels, and services — all accepting \$VGF. With ownership renounced and supply fixed at 1 billion, \$VGF is designed for daily use, not trading.

2. Tokenomics

This closed-loop ensures tokens recirculate to fund growth.
